Best Nondestructive Testing Program

Luminant Mining

Best Asset Health Management Program

Domtar Espanola

Best Design for Reliability Award

WellSpan Health Facility Management Department

Best Lubrication Program

New Braunfels Utilities

Best Green Reliability (Sustainability) Program

Merck & Co.

About the Uptime Best Maintenance Reliability Program Awards

Part of Uptime's mission to do good community work is to promote and acknowledge best practices. We created the Uptime Magazine Best Maintenance Reliability Awards to provide positive exposure and acknowledgement for maintenance reliability professionals from around the world.

Established in 2006 the Uptime Best Maintenance Reliability Program of the Year Awards has two primary purposes:

- 1) To acknowledge organizations and people who have achieved high levels of performance in maintenance reliability
- 2) To encourage other organizations and people to adopt the practices of these high performance programs

You are invited to gain inspiration, borrow their ideas, and get their advice as they present their award winning programs at IMC-2011, the 26th International Maintenance Conference, being held December 5-8, 2011.

Visit www.imc-2011.com for more information.
